EDUCATION

Virginia Polytechnic Institute and State University

Blacksburg, Virginia

Pamplin College of Business

Graduation: May 2028

- B.S in **Fintech and Big Data Analytics (Quantitative Finance)**
- **Related Coursework:** Intro to Accounting I & II, Calculus I – III, Business Statistics, Microeconomics, Macroeconomics

TECHNICAL SKILLS

Python, SQL, Java, Advanced Excel, Tableau, Time Series Analysis, Machine Learning, Statistical Modeling, Risk Analysis, Data Visualization, Power BI, React, TensorFlow

EXPERIENCE

Self-Taught College Barber | Entrepreneurial Venture

December 2024 - Present

- Built a recurring-client business to 65–70 weekly customers from scratch, owning scheduling, pricing, and customer relationships.
- Grew the client base roughly 30% through referrals and social media, with almost no paid advertising.
- Generated \$15,000+ in revenue and retained clients for 18+ months using a steady weekly cadence and tiered pricing.

Arcanium Labs | Co-founder

August 2024 – May 2025

- Co-founded an AI startup that automated construction cost estimating and raised \$800K in outside capital.
- Earned admission to Microsoft for Startups, which came with \$350K in Azure credits to run the company's AI workloads.
- Led the engineering team that designed and deployed the AI estimating agents for material takeoffs, logistics, and job costing.
- Returned all raised capital to investors and chose to attend college full-time.

PROJECTS

World Cup Predictive Analytics & Tracking Platform | SQL, Power BI, React, Kaggle, Python

June 2026 – Present

- Used SQL to extract and filter soccer players/tournament data from large databases of 50K+ records
- Cleaned and prepared data using Python, then performed clustering and multiple regression to uncover key patterns.
- Presented Power BI dashboards showing that team chemistry and player valuations were the top contributing factors to technical and sports audiences at Virginia Tech.
- Designed an interactive scouting and simulation dashboard served via a NestJS and TypeScript backend, enabling users to run statistical match simulations

AI Zoning Agent | IBM watsonx.ai, RAG, Google APIs, NLP

March 2026

- Built an AI assistant that lets non-experts ask plain-English questions about local zoning law and get reliable answers, cutting research time by 50–60%.
- Improved answer accuracy and grounding by engineering a Retrieval-Augmented Generation (RAG) pipeline over local zoning ordinances, anchoring LLM outputs in authoritative source documents.
- Delivered specialized legal research as a web app by designing data pipelines that standardized inconsistent zoning rules for real-time retrieval.

AI Infrastructure & Commodity Intelligence Platform | SQL, LSTM, React, FastAPI, TensorFlow

May 2026

- Built a platform that ranks the best physical sites for new AI data centers, scoring 34+ real hyperscale facilities from Microsoft, Google, AWS, and Meta to learn what makes a location viable.
- Created machine-learning models that forecast prices across 16 commodity markets, improving directional accuracy from ~55% to ~62%.
- Deployed the full application on Vercel and Railway with sub-200-millisecond predictions, pulling live data from 10+ sources including the EIA, USGS, NASA POWER, and Alpha Vantage.

LEADERSHIP

Phi Gamma Nu | Board Member

February 2026 – Present

- Spearheading the launch of a professional business fraternity chapter from the ground up, developing marketing strategies, recruiting members, and establishing fraternity presence on campus.

Certifications: Bloomberg Market Concepts, Claude Education, JPMorgan Investment Banking Forage Simulation

Interests: RF Tennis | Sports Analytics | Cooking Indian Food | Outdoor Photography | RnB Music | Hiking | Horror Movies
